Biography

Dr. Adnan Kiral is a distinguished academic specializing in structural and earthquake engineering. He completed his Ph.D. at the University of Sheffield, focusing on innovative seismic control technologies, after earning his Master's degree in Civil Engineering from Brunel University. His undergraduate studies were in civil engineering at Sakarya University. With a strong academic foundation, Dr. Kiral has contributed extensively to the study of building dynamics, retrofitting techniques, and structural performance under seismic conditions. His research includes innovative solutions for seismic response control, such as semi-active damping systems, and he has shared his findings through numerous high-impact journal articles, book chapters, and international conferences. Dr. Kiral's work plays a critical role in advancing the resilience and safety of modern infrastructure.
